# Instructions

General information regarding all trains. Read this before driving the first train.

## Crew

**Habbo** is staffed. TKL Habbo also handles the switchgear in **Kristineberg** and **Korsnäs**. The switchgear in **Mariefred** and **Göransberg** is controlled from a joint train dispatch located between these stations. Other traffic locations are **unattended** and are operated by train drivers. When leaving the unattended traffic junction, train drivers must contact the nearest TKL for clearance of the train path. The approved train route applies to the entrance at the guarded traffic junction unless TKL states otherwise.

## Timetable

Passenger trains may depart at the earliest according to schedule. Freight trains may depart before the timetable if there is space in relation to other trains' timetables. TKL decides this.

## On arrival with wagon loads to shadow station

Wagons with **\*\*destination to stations on the track and to other shadow station \*\*** are lifted to departure tracks according to the block information available at the shadow station. Note that there is a maximum number of carriages per block.

Wagons with **destination to the shadow station and beyond** as well as wagons that do not fit in the departing block as above are placed on the table.

## Evaluation

Is the content of the services understandable? Feel free to leave comments to Stefan who is developing the planning system.

# Instructions

General information regarding all trains. Read this before driving the first train.

## Crew

**Habbo** is staffed. TKL Habbo also handles the switchgear in **Kristineberg** and **Korsnäs**. The switchgear in **Mariefred** and **Göransberg** is controlled from a joint train dispatch located between these stations. Other traffic locations are **unattended** and are operated by train drivers. When leaving the unattended traffic junction, train drivers must contact the nearest TKL for clearance of the train path. The approved train route applies to the entrance at the guarded traffic junction unless TKL states otherwise.

## Timetable

Passenger trains may depart at the earliest according to schedule. Freight trains may depart before the timetable if there is space in relation to other trains' timetables. TKL decides this.

## On arrival with wagon loads to shadow station

Wagons with **\*\*destination to stations on the track and to other shadow station \*\*** are lifted to departure tracks according to the block information available at the shadow station. Note that there is a maximum number of carriages per block.

Wagons with **destination to the shadow station and beyond** as well as wagons that do not fit in the departing block as above are placed on the table.

## Evaluation

Is the content of the services understandable? Feel free to leave comments to Stefan who is developing the planning system.

*Drive and have fun!*
